FOREWORD

Organizing and conducting educational surveys of local school administrative units is a function and service of the State Department of Public Instruction. Specific responsibility for directing and supervising surveys, including the selection of personnel to assist in all aspects of the studies, is vested in the Department's Division of School Planning.

Comprehensive educational surveys are made by the Department upon official request of county and city boards of education, since it is they who have jurisdiction over the schools in their administrative units. Similarly, implementation of survey recommendations lies within the discretion and judgment of city and county boards. This official liaison between local and State school authorities gives validity to educational surveys and provides stability in their interpretation and implementation.

It is hoped that the findings and the recommendations contained in this report will be informative and constructive. The report should be analyzed carefully in terms of implications for improving school administration, school organization, facilities, and classroom instruction. Good schools are the result of thoughtful planning and forthright decision; this report is designed to stimulate action in achieving both these objectives.

As consideration is given to this report and as plans are developed for its implementation, the Department will be pleased to provide such additional consultative services as may be requested by the superintendent and the board of education.

A. Craig Phillips, State Superintendent
Department of Public Instruction

INTRODUCTION

At the request of the Warren County Board of Education and the Superintendent of Schools, the Division of School Planning, North Carolina Department of Public Instruction, conducted a school survey for the Warren County Board of Education in the winter of 1974-75. The study was made by a five-member committee. The Survey Committee held conferences with administrators and visited each school in the unit. In addition to the work by the Survey Committee, a consulting engineer and consulting architect with the Division of School Planning visited and evaluated each school in the unit.

The purposes of this study were to determine the status of public education in the Warren County Administrative Unit and to present the findings and recommendations with special emphasis in the areas of organization, finance, and facilities. Data used in this survey were obtained from (1) office of the Warren County Superintendent of Schools, (2) records of the North Carolina Department of Public Instruction, (3) state and federal agencies and publications, and (4) visitations and observations at each school.

The Division of School Planning and the Survey Committee submit this report as one resource for the development of short- and/or long-range plans with regard to improving public educational opportunities for students. Plans for improvement, whether the plans be in accord with the suggestions and recommendations in this report, the modification of these recommendations, or new and different plans, should be reviewed periodically to insure that they are current with the goals and objectives of modern educational development.

SUMMARY FINDINGS

S U M M A R Y O F F I N D I N G S

THE COMMUNITY

- o The total population in Warren County peaked at 23,539 in 1950 but declined to 19,652 in 1960 and 15,810 in 1970. The North Carolina Department of Administration, Division of State Planning, has projected a total population of 12,025 in 1980. With the exception of Vance, the counties surrounding Warren declined between 1960 and 1970; all of the counties surrounding Warren are projected to decline between 1970 and 1980.
- o According to the 1970 census, every township in Warren County except Norlina experienced a population decline between 1960 and 1970; Norlina had an increase of 42 persons during this period.
- o In 1964, Warren County had 389 live births; in 1969, the number of live births in Warren County declined to 206 but increased to 246 in 1971. The number of live births for 1974 has been estimated at 216.
- o Between 1960 and 1970, Warren County experienced a significant increase in the number of professional workers, clerical workers, craftsmen, assembly-line workers, service workers, and private household workers. During this decade, the number of farmers, farm managers, farm laborers, and farm foremen declined from 1,892 to 551.
- o In 1960, Warren County had 626 persons commuting out of the county for employment; in 1970, this number had increased to 1,431. According to the 1970 census, 289 persons commuted to Halifax County, 589 commuted to Vance, and 165 commuted to Virginia. Residents of Warren also commute to more distant counties such as Durham, Granville, Orange, Wake, and Wilson. Warren also has 342 in-commuters with approximately 141 of this number commuting from Vance.
- o There are three primary indicators by which the wealth of a county can be measured:

Per Capita Income - In 1958, Warren's per capita income was \$798.00 or 56.2 per cent of the North Carolina average. For 1970, Warren's per capita income had increased to \$1,963.00 or 61.2 per cent of the North Carolina average. According to the 1970 census, approximately 32.6 per cent of the families in Warren County had an income of less than \$3,000.00.

Per Capita Retail Sales - In 1971-72, Warren County had per capita retail sales of \$1,388.00; the North Carolina average was \$2,784.00. The per capita retail sales in neighboring counties ranged from a high of \$3,244.00 in Nash County to a low of \$1,048.00 in Northampton County.

Per Pupil Property Valuation - In 1973-74, the per pupil property valuation in Warren County was \$23,380.00; the average for North Carolina was \$41,603.00. The property valuation per student in counties surrounding Warren ranged from a low of \$21,995.00 in Franklin to a high of \$33,515.00 in Vance.

- o Approximately 42.3 per cent of the housing in Warren is classified as substandard; the average for North Carolina is 15.4 per cent. Approximately 3.3 per cent of the houses in Warren are mobile homes; the average for North Carolina is 5.3 per cent.
- o The Soul City schedule for residential development includes 1,649 residences and a total population of 4,022 by 1980.

THE SCHOOL SYSTEM

- o For 1974-75, Warren County had three high school attendance areas. In the Littleton High School attendance area, the schools were organized on a K-6, 7-12 plan. In the Norlina High School attendance area, the schools were organized on a K-3, 4-8, 9-12 plan. In the John Graham High School attendance area, the schools were organized on a K-6, 7-9, 10-12 plan of organization. The Warren County Board of Education took action in the spring of 1975 to close the Littleton High School and reassign the students to Graham and Hawkins.
- o The Warren Academy, located in Warrenton, serves 151 elementary and 96 secondary students from the Warren County Administrative Unit. The Vaughan and Littleton schools serve approximately 109 students who reside in Halifax County. The Warren Administrative Unit also serves approximately 173 students who reside in Virginia.

- o According to the 1970 census, 29 per cent of Warren's residents have completed high school; the North Carolina average is 38.5 per cent.
- o In 1973, 39.6 per cent of the high school graduates in Warren County continued their education. Warren County has a greater percentage of students entering the job market upon graduation than the average school system in North Carolina.
- o Warren employs two high school teachers from local funds. Four music teachers serve John Graham, Norlina, Hawkins, and North Warren. The elementary schools do not have the services of special music teachers. Warren does not employ special art teachers at the elementary or secondary level.
- o Occupational exploration programs are provided in grades seven and eight for disadvantaged students. Introductory occupational programs are available to students in grade nine at Norlina and Hawkins. Approximately 70 per cent of the students in 10-12 are enrolled in occupational programs.
- o Warren offers programs for exceptional children in the areas of educable mentally retarded, speech impaired, hearing impaired, visually impaired, crippled, learning disabled, and trainable mentally retarded.
- o John Graham offers approximately 59 courses in grades 10-12; Norlina offers approximately 44 courses in grades 9-12; Littleton offered approximately 32 courses in grades 9-12.
- o Full-time, certified librarians are employed at Hawkins, Graham, Norlina, North Warren, and Northside. Library aides are employed at Littleton, Boyd, South Warren, and Vaughan.
- o Approximately 3,000 of Warren's 4,000 students are transported to school on school buses.

SCHOOL FINANCE

- o For 1973-74, Warren County spent \$1,043.32 per student for current expenditures; the average school system in North Carolina spent \$915.15. Warren spent \$118.45 from local funds as compared to a state average of \$170.66. Warren spent \$244.51 from federal funds or more than double the state average of \$115.42. Warren also received a greater amount per pupil from state funds than the average school system in North Carolina.

- o In 1969-70, the Warren Administrative Unit spent \$53.74 from local funds or 52 per cent of the state average. For 1973-74, the local per pupil expenditure had increased to \$118.45 or 69 per cent of the state average.
- o The local per pupil expenditures in administrative units surrounding Warren range from a low of \$64.50 in Franklinton to a high of \$206.24 in Rocky Mount.
- o In 1973-74, Warren spent \$25.75 per pupil in the area of administration; expenditures in surrounding administrative units range from a high of \$48.38 in Franklinton to a low of \$22.32 in Franklin County.
- o In the area of instructional services, Warren spent \$622.12 per student; this expenditure is higher than in any of the surrounding units and is higher than the North Carolina average of \$601.90.
- o For 1973-74, Warren spent \$15.13 per student for instructional supplies, library books, and textbooks from local and federal funds; the state average was \$12.88.
- o Warren County pays a \$150.00 teaching supplement. Teaching supplements in Roanoke Rapids, Rocky Mount, Northampton County, and Vance County range from \$160.00 to \$444.00. Franklin County, Franklinton City, Halifax County, Weldon City, and Nash County do not pay teaching supplements.
- o Warren County employs two high school teachers or .9 per cent of the total instructional staff from local funds. The average system in North Carolina employs 6.4 per cent of the instructional staff from local funds.
- o In 1973-74, Warren had a tax rate of \$1.46 and a 50 per cent assessment ratio; this gave Warren an effective countywide tax rate of \$.73. In 1973-74, the average countywide effective tax rate was \$.725. The effective tax rates in counties surrounding Warren ranged from a low of \$.62 in Halifax County to a high of \$.935 in Franklin County.
- o In 1973-74, approximately 47.3 per cent of the countywide levy was designated for schools.
- o In 1973-74, Warren County received approximately \$160,000.00 from the local option one per cent sales tax.

- o Warren charges a basic supply fee of \$2.50 to all students. High school students pay special course fees which range from \$2.50 to \$5.00 per course.
- o The Warren County Commissioners have received the following from revenue sharing: 1971-72, \$122,968.00; 1972-73, \$256,628.00; 1973-74, \$336,055.00; 1974-75, \$321,793.00.
- o The bonding capacity of a county is limited to eight per cent of the appraised valuation. Warren County has an appraised valuation of \$94,433,234.00. Warren presently has a school debt of \$240,000.00 and a remaining bonding capacity of \$7,314,658.00.
- o The Warren County Board of Education will receive \$1,069,420.89 from the 1973 statewide bond referendum. The Board also has \$19,440.22 remaining from the 1963 bond referendum.

SCHOOL FACILITIES

- o The school facilities in Warren County presently have a capacity for approximately 4,035 students not including the Littleton, Afton-Elberon, and Macon schools. Warren County has fire-resistive facilities which are suitable for long-range use to house approximately 2,580 students.
- o The chart on the following page summarizes the facility data.

WARREN COUNTY FACILITY DATA

(a) Afton-Elberon is operated as an addition to South Warren.

(b) Macon is operated as an addition to Boyd - only 1925 building used.

The Capacity for elementary pupils was computed on the basis of 25 pupils per classroom and the capacity for high school pupils was computed on the basis of 25 pupils and 90 percent utilization.

CODE: A-Adequate I-Inadequate

RECOMMENDATIONS

RECOMMENDATIONS

This section includes recommendations to the Warren County Board of Education. These recommendations, which are based on data collected, observations, and interviews with staff and students, should be considered advisory in nature and used by the school officials and the Warren County Board of Education in any manner deemed feasible and practical.

As a matter of practicality, a survey of this type must be completed and published at some given point in time. In reality, planning is a continuous process which reflects changing conditions and priorities. The Division of School Planning will be pleased to provide additional consultative services as the Warren County Board of Education implements these or other plans.

ORGANIZATION AND FACILITIES

The grade organization of a school system is greatly influenced by factors such as the availability of existing facilities, the number of students, travel times and distances, and the financial capability of the district. After studying the data which was gathered for the Warren County Survey, the Committee agreed on the following positions which were fundamental to other decisions:

- o Warren County has approximately 1,300 students in grades 9-12 or approximately 916 students in grades 10-12. A high school should have a minimum of 750 students to offer a comprehensive program at a reasonable cost. After studying travel times, distances, and the distribution of students, the Committee recommends that the long-range plan for Warren County include one high school.
- o The student population projections, which are based on historical data and on the number of live births, indicate a significant decline during the next five years. However, if Soul City develops as projected by the Soul City officials, the downward trend could be reversed. The Committee feels that all plans for organization and facilities in Warren County must be appropriate if the population continues to decline, but also be appropriate if the administrative unit experiences significant growth.

LITTLETON

Following the visit of the Survey Committee, but prior to the completion of this report, the Warren County Board of Education took action to close the Littleton School and to reassign the Littleton students to Graham and Hawkins. The Littleton junior high and high school programs are very limited and cannot be expanded significantly with only 247 students in grades 7-12. Littleton presently does not have a band. Only disadvantaged students have a middle grades occupational program. There are no shop-type programs for the high school students. There are only 32 courses in grades 9-12. With a staff of 12 teachers, Littleton cannot have specialists in all subject areas.

Closing Littletown will further crowd Hawkins; however, the Littleton students will have a much better situation, educationally. Hawkins has a staff of 30 teachers in grades 7-9 with specialists in most curriculum areas.

Graham, likewise, would be further crowded but can offer an expanded program to the Littleton students. Occupational programs such as drafting, carpentry, auto mechanics, and agriculture are available. Graham offers 59 courses including music, third year French, and elective courses in language arts.

The Committee supports and commends the Warren County Board of Education for the decision to close Littleton. The students from Littleton will have a broader range of educational opportunities at Graham and Hawkins. Closing Littleton will also result in a significant savings in operational cost. In many cases, the Littleton students can be absorbed into existing classes at Graham and Hawkins without additional staff members. The 12 positions at Littleton can be used to strengthen the programs at Hawkins, Graham, and other schools in the system.

HIGH SCHOOL ORGANIZATION

The present high school organization in Warrren County includes grades 10-12 at Graham, grades 9-12 at Norlina, and grades 7-12 at Littleton.

Warren County presently has approximately 1,300 students in grades

9-12. The population projections indicate little change in the 9-12 membership through 1978-79; however, a sharp decline is projected for grades K-6. If the number of K-6 students declines as projected during the next four years, the number of middle school and high school students will probably decline during the 1980's.

The Committee recommends that the long-range plan for Warren County include one four-year high school serving grades 9-12. The following were considered by the Committee in making this recommendation:

- o The emotional, physical, and intellectual maturity of students in grade 9 is more similar to that of students in grades 10-12 than to students in grades 7-8.
- o Grade 9 and grade 10 generally require the same facilities and staff qualifications. Introductory courses which are offered to students in grade 9 such as French I, Spanish I, Algebra I, Art I, Band I, and Chorus I are also offered to students in grade 10. By eliminating this duplication, a four-year high school should be more economical to operate.
- o The Committee considers a high school with 1,000 to 1,400 students to be optimum in size. Grade 9 can be included in the high school without exceeding a size which the Committee considers to be optimum.

The recommendation for a four-year high school is based on the assumption that the membership in Warren County will continue to decline or remain relatively stable. If the 9-12 membership should exceed 1,500 to 1,600 students, further consideration could be given to a 10-12 organization or two high schools with a 9-12 organization.

MIDDLE SCHOOL ORGANIZATION

Ideally, a middle school should include grades 6-8 or 5-8 and have a membership of approximately 700 students. In developing a middle grades organization for Warren County, an important consideration must be the impact on the elementary membership and the availability of elementary facilities. For example, Warren County has elementary facilities at Boyd, North Warren, Northside, South Warren, and Vaughan which are suitable for long-range use and capable of housing approximately 2,025 students. A middle school organization including grades 5-8 or 6-8 would leave the elementary

schools with surplus capacity. The Committee recommends that the long-range plan include one middle school to serve grades 7-8. The membership at this school would be approximately 700 students.

ELEMENTARY ORGANIZATION

In 1970-71, Warren County had 372 students in grade 1; for 1974-75, the grade 1 membership had declined to 254. A projection based on the number of live births indicates a further decline. The Committee recommends that Warren continue with a K-6 organization; however, a K-5 or K-4 organization would be acceptable if changes are needed in the middle grades organization.

PHASING INTO THE LONG-RANGE PLAN

The Committee has developed a long-range plan which can be implemented in three phases. This plan assumes that the student population will continue to decline as projected.

Phase I

Top priority in a plan of reorganization should include new high school facilities. The original buildings at Graham High School and Norlina High School are multistory, nonfire-resistive structures. Neither school has adequate facilities for science, art, music, and occupational education. Norlina does not have an auditorium or teaching theater. In Phase I, the Committee recommends the construction of a new high school to serve approximately 900 students in grades 10-12. The new high school should be located on a new site in the Warrenton/Norlina area. A site for a comprehensive high school should include 50 to 100 acres of usable land.

The Committee recommends that the former Norlina High School and the former John Graham High School house grades 7-9 in Phase I. These two schools have a present capacity for approximately 1,150 students;

the 7-9 membership for 1974-75 was 1,078. The attendance line between the Norlina and Graham districts should be adjusted to utilize the capacity of the two schools.

The Committee recommends that Boyd, Northside, South Warren, Vaughan, and the best facilities at Hawkins and North Warren be used to house grades K-6 in Phase I. These buildings have a long-range capacity of 2,375; the K-6 membership for 1974-75, with a full kindergarten program, would be 2,123. Only the 1956 classroom building, gymnasium, cafeteria, and shop at Hawkins will be needed in Phase I. Major renovations or additions are not recommended for Hawkins as this school can be abandoned in Phase II. Only the 1952 classroom building, cafeteria, and shop building at North Warren will be needed. The Littleton, Afton-Elberon, and Macon sites will not be needed as schools under this plan.

Phase II

In Phase II, additional teaching stations should be added to the new Warren High School to accommodate grade 9. Based on the pupil population projections, additional teaching stations should be constructed at the high school to accommodate an additional 200 students. The projections for 1978-79 indicate a 9-12 membership of approximately 1,285; however, the 1974-75 first grade has a membership of only 254 students. The number of teaching stations which are added to the high school in Phase II should be based on the latest projections available; however, there is a danger of over building if the capacity of this building exceeds 1,100 students.

In Phase II, the Committee recommends that grades 7 and 8 be temporarily housed at the Norlina High School. This building has a capacity for approximately 610 students and a projected membership

for approximately 713. All 7-8 students from the county should be housed at Norlina while the obsolete facilities at the Graham school are replaced. The 1915 classroom/auditorium building, the 1937 home economics building, and the 1937-45 agriculture shop at Graham should be replaced during this phase. The 1960 gymnasium, the 1969 media center, the 1969 carpentry shop, and the 1972 auto shop are suitable for long-range use.

The John Graham site has less than 10 acres. Every effort should be made to acquire additional property at this site.

If Phase II is not implemented until 1978-79, it appears that Hawkins can be phased out of use. The Boyd, North Warren, Northside, South Warren, and Vaughan schools have a capacity for approximately 2,025 students; the projected K-6 membership for 1977-78 is 1,705.

Phase III

In Phase II, all 7-8 students were housed at Norlina while the older facilities at Graham were replaced. In Phase III, the 7-8 students should be moved from Norlina to Graham and the Norlina school can be phased out of use.

LONG-RANGE PLAN IF GROWTH SHOULD OCCUR

Phases I, II, and III were based on the assumption that the student membership in Warren would continue to decline as projected.

The Survey Committee visited with the officials from Soul City while in Warren County. This planned community presently encompasses 2,200 acres and the developer expects the community to eventually include 5,200 acres. The long-range plans for this new community include 500 housing units and approximately 4,000 residents by 1980.

If this community develops on schedule, there would be approximately 1,000 K-12 students living in the Soul City community by 1980. The projections for the year 2,003 indicate 13,326 residential units and a total population of 46,641 or three times the present population of Warren County.

The information available at this time is not sufficient to assess the potential of this new community. If Soul City is modestly successful, Warren County's student population decline could be halted; if the Soul City project develops according to plans, the school population in Warren County could double by 1984.

Prior to developing a long-range facility and organization plan for Warren County, the Committee agreed that all facility plans should be appropriate if the student population decline continues, but also appropriate if unprecedented growth should occur. After developing a plan which assumed that the decline would continue, the Committee studied the impact which 4,000 residents or 1,000 students from Soul City would have on the school system. The Committee concluded that the facilities recommended in Phases I, II, and III would be appropriate. The new Warren High School could serve grades 10-12 with a student membership of approximately 1,067. Additional land should be acquired around the Norlina school or a new site could be purchased to construct a new school for approximately 700 students in grades 7-9. The Graham school could also house approximately 700 students in grades 7-9.

PHASE I

SCHOOLS	GRADES	CAPACITY		MEMBERSHIP (A)	COMMENTS
		PRESENT	LONG-RANGE		
NEW WARREN HIGH SCHOOL	10-12	--	--	900	Construct a new high school for 900 students in 10-12.
NORLINA HIGH SCHOOL	7-9	610	90	382	Adjust attendance line between Norlina and John Graham districts to utilize capacity of buildings.
JOHN GRAHAM HIGH SCHOOL	7-9	540	115	705	
	TOTAL 7-9	1,150	205	1,087	
HAWKINS	4-6	700	350		Use 1956 classroom building, gym, cafeteria, and shop without major renovations or additions.
BOYD	K-3	425	425		Use 1952 classroom building, cafeteria, and shop.

VAUGHAN	K-6	450		
	TOTAL K-6	2,025	1,705	

(A) BASED ON 1977-78 PROJECTIONS WITH A FULL KINDERGARTEN PROGRAM.

(B) PROJECTIONS FOR GRADES K-6 INDICATE A SIGNIFICANT DECLINE IN GRADES 9-12 IN THE 1980's.

LONG-RANGE PLAN WITH AN
ADDITIONAL 1,000 STUDENTS FROM SOUL CITY

SCHOOL	GRADES	CAPACITY	MEMBERSHIP (A)	COMMENTS
NEW WARREN HIGH SCHOOL	10-12	1,100	1,067	
GRAHAM	7-9	700		Acquire land and replace the Norlina school to serve 700 students in grades 7-9.
NORLINA	7-9	--		
	TOTAL 7-9		1,393	
BOYD	K-6	425		If it appears that growth will continue, construct a new elementary school in Soul City to accommodate approximately 600 students in K-6.
NORTH WARREN	K-6	425		
NORTHSIDE	K-6	400		
SOUTH WARREN	K-6	325		
VAUGHAN	K-6	450		
	TOTAL K-6	2,025	2,243	

(A) BASED ON 1978-79 PROJECTIONS PLUS 1,000 STUDENTS AS PROJECTED FOR SOUL CITY.

NOTE: THE 1,000 STUDENTS WERE DISTRIBUTED AS FOLLOWS: K-6, 538; 7-9, 255; 10-12, 207.

The Boyd, North Warren, Northside, South Warren, and Vaughan schools would have a capacity for approximately 2,025 students but a membership in grades K-6 of approximately 2,243. The Board of Education would have the option of expanding the Northside and/or Boyd schools or constructing a new elementary school in the Soul City area. If it appears that Soul City would continue to grow at this point, a new elementary school should be constructed in Soul City.

In summary, a major challenge which faces the Warren County Board of Education is to plan facilities which are appropriate if the school population should continue to decline, but also be appropriate if growth should occur. The long-range plan recommended by the Committee will allow the Warren County Board of Education to provide for students who are presently residing in Warren County, but also to modify their plan to accommodate an influx of students.

FACILITIES FOR CULTURAL ARTS

The only auditoriums in the Warren County system which are suitable for music and theatrical productions are located at the Graham and Littleton schools. The Committee recommends that the long-range plan include an auditorium at the new Warren High School. As a minimum, this facility should seat the largest class. If this facility is to serve the community, additional seating will be required.

At present, Warren County does not employ a special art teacher or offer special courses in art at the middle school or high school level. An art facility with approximately 1,500 square feet of floor space should be provided in the new high school. Provisions should also be made for art at the Graham and Norlina schools.

FLEXIBLE
INSTRUCTIONAL SPACES

All the facilities in the Warren County Administrative Unit were planned and constructed to accommodate a traditional program of instruction. As new buildings are planned or as existing buildings are renovated, the Committee recommends that spaces which will accommodate different kinds of activities be included. Spaces which would accommodate from 60 to 90 children would facilitate the program of individualized instruction which teachers have initiated throughout the county.

FACILITIES FOR
EXCEPTIONAL
CHILDREN

Trainable mentally retarded children from the Warren Administrative Unit are housed at the North Warren school. As funds and space are available, the Committee recommends that the trainable program be moved to a more central location.

Special facilities should be planned for TMR students. A classroom with a dryer, washer, stove, kitchen sink and cabinets, shop-type work benches, and general facilities for craft-type work is needed for older students. This room should include some carpeted areas with comfortable furniture and other areas suitable for art work or shop-related activities. Facilities for trainable children are generally used year-round and should be air conditioned.

LONG-RANGE PLAN
FOR EXISTING
FACILITIES

The Committee recommends that a comprehensive plan be developed for each campus in the Warren County Administrative Unit which will be used long-range. This comprehensive plan should provide space for administration, health and guidance services, special education, physical education, small and large instructional spaces, an adequate media center, food services, storage, and kindergartens

where applicable. The plan should also include site development with consideration given to physical education, parking for cars and buses, nature trails, and room for future expansion or additions.

EDUCATIONAL SPECIFICATIONS

A new high school and replacement facilities on the Graham campus are required to implement the long-range plan. The Committee recommends that the Board of Education and superintendent appoint committees of central office personnel, board members, principals, teachers, and parents to visit several new schools, observe, and to develop educational specifications for these two projects. If the county commissioners should call for a bond referendum, the Committee recommends that the educational specifications be developed simultaneously with preparations for passing the referendum.

INSTRUCTIONAL PROGRAM

ELEMENTARY PROGRAMS

The Board of Education, administrative staff and teachers, are to be commended for the excellent elementary programs in Warren County.

The elementary teachers in Warren County are committed to an individualized, personalized approach. Students progress at their own rate of speed and are encouraged to learn in the mode of instruction which suits their individual interests and needs.

The elementary programs in Warren County were relaxed and informal, but orderly. Interest centers in classrooms included mathematics, language arts, social studies, and science. There was much evidence of good, creative writing. Students were actively involved in projects related to their course of study.

Warren does not employ special art or music teachers for grades K-6. Specialists should be employed in these areas when funds are available. Elementary students should learn to play musical instruments in a sequential program as suggested below:

Kindergarten	-	step bells
Grade 1	-	xylophone
Grade 2	-	Swiss bells
Grade 3	-	zither and mandolin
Grade 4	-	recorders or song flutes
Grade 5	-	piano keyboards, drum pods and sticks
Grade 6	-	ukulele or guitar

Art specialists are also needed. Students should have experiences in sketching and painting, ceramics, weaving, stitchery, and natural crafts. The elementary teachers are to be commended for

the art programs in Warren, but these programs can be greatly enriched by specialists who are certified in art and music.

For 1974-75, Warren County employed full-time librarians at Graham, Norlina, Hawkins, North Warren, and Northside; Littleton, Miriam Boyd, South Warren, and Vaughan were served by library aides. The Committee recommends that every effort be made to provide full-time librarians at each school.

MIDDLE GRADES PROGRAMS

Middle grades and high school programs, more than elementary programs, are handicapped by inadequate facilities, staff positions, and funds for supplies and equipment. The programs in grades 7 and 8 at North Warren and Hawkins are similar. Each school has an occupational program for disadvantaged students. Neither Hawkins nor North Warren offers an occupational exploration program for all middle grades students. Both schools offer a band program to middle grades students but neither offer special courses or employ special teachers in art or choral music. Hawkins has a full-time librarian and a full-time guidance counselor; North Warren has a full-time librarian and a half-time guidance counselor.

The Committee recommends that every effort be made to expand the program offerings for middle grades students. The middle school should provide an opportunity for students to have a variety of educational experiences including occupational exploration, art, music, dramatics, and conversational foreign languages during the critical, transitional years between childhood and adulthood. The middle grades curriculum should also include a strong program of intramural sports. In addition to the traditional sports such as softball, football, and basketball, middle grades students should have an opportunity to participate in lifetime sports such as tennis, bowling, swimming, golf, archery, and skating.

A program of studies for students in grades 7-8 should be developed by the administrative staff, supervisory staff, principals, and teachers; however, the typical program of studies in the appendix should be helpful as a point of departure.

HIGH SCHOOL PROGRAMS

For 1974-75, Warren County is operating three high schools. The number of high school course offerings ranges from a low of 32 at Littleton (9-12) to a high of 59 at Graham (10-12). Only basic programs are offered in the areas of language arts, mathematics, science, and social studies. Littleton and Norlina offer two years of French; John Graham offers three years of French.

Norlina and Graham high schools offer several occupational programs. Trade and industrial education programs include drafting, bricklaying, carpentry, industrial cooperative training, and auto mechanics. Program offerings in the area of home economics include child development, clothing and textiles, family living, and food services. The programs in agriculture include forest and pulpwood production, agriculture mechanics, ornamental horticulture, farm management, and agriculture construction. Both schools offer programs in business education as part of the general education curriculum. An introduction to vocations program is available to all students in grade nine.

The Committee recommends that every effort be made to offer comprehensive art programs at Norlina and Graham. The art curriculum should build upon earlier experiences and include painting, sketching, weaving, ceramics, enameling, and crafts. A further expansion of the cultural arts program at the high school level should include chorus, dramatics, creative writing, modern dance, and orchestra.

The John Graham school has recently adopted a mini-course approach to language arts. The Committee recommends that further consideration be given to this approach in each of the high

schools. A mini-course schedule, which will allow students to select courses according to their interests and needs, is an effective means of further diversifying the course offerings.

The Committee recommends that the staff at the two high schools continue their efforts to upgrade and enrich the curriculum. Additional programs such as art, choral music, dramatics, clerical office occupations, and distributive education might be added in 1975-76; however, the curriculum cannot be expanded significantly until all 9-12 or 10-12 students in Warren County attend one high school.

In summary, the middle school and high school programs are housed in inadequate facilities and handicapped by lack of supplies, equipment, and staff. Upon completion of the new Warren High School which was recommended in Phase I, the high school curriculum can be expanded through better utilization of the staff and facilities. The middle grades students, when housed at Norlina and Graham, will have better facilities for a comprehensive middle grades program. It appears, however, that additional staff positions will be needed to provide librarians, art, and music teachers at all schools. Additional positions will also be needed to expand the occupational exploration and other enrichment courses at the middle grades level.

SCHOOL FINANCE

LOCAL PER PUPIL EXPENDITURE

In 1969-70, the Warren County Administrative Unit spent \$53.74 for current expense from local funds; this amount was approximately 52% of the state average. For 1973-74, the local per pupil expenditure in Warren County had increased to \$118.45 or 69% of the state average.

The citizens of Warren are to be commended for increasing their contribution to education; however, during this period of time the cost of staffing, operating, and maintaining the schools has increased significantly; the price of fuel oil and paper, for example, has more than doubled. The Committee has identified several areas where additional current expense funds are needed:

- o Additional librarians, art teachers, and music teachers are needed at the elementary level.
- o Additional positions are needed at the middle grades level to offer exploratory and enrichment programs.
- o Additional funds are needed to properly maintain instructional equipment, school facilities, and school sites.
- o Additional operating funds are needed for utilities, cleaning supplies, and custodial positions.
- o Additional funds are needed to supplement the salaries of master or lead teachers at all grade levels.
- o Additional funds are needed to eliminate supply fees.

The above list is not all-inclusive but includes several critical areas where additional current expense funds are needed. The Committee recommends that the Board of Education and the citizens of Warren make every effort to continue improving the local financing of public education.

FEES

Warren County charges a basic supply fee of \$2.50; fees for special courses range from \$2.50 to \$5.00. While these fees are not excessive, the Committee recommends that additional funds be budgeted for supplies and equipment and that the elimination of fees be established as a goal by the Warren County Board of Education.

MAINTENANCE OF PLANT

In 1973-74, the Warren County Administrative Unit spent approximately \$84,000 or \$21.41 per student for maintenance of plant; the average school system in North Carolina spent \$28.61 per student. Warren County has approximately 4,000 students in grades K-12; based on a replacement value of \$2,500 per student, the replacement value of the facilities in Warren County would be approximately \$10,000,000. Research studies indicate that 2% of replacement value is necessary for an adequate maintenance program. An adequate expenditure for the Warren County Administrative Unit would be approximately \$200,000 per year.

There is often a fine line between renovations and maintenance; however, the following areas need attention either in a continual maintenance program or as renovation projects:

- o Incandescent lights should be replaced with fluorescent fixtures in instructional areas.
- o Adequate electrical service should be installed to operate audiovisual equipment.
- o Toilets should be upgraded with new finishes on floors and walls. Partitions should be replaced or refinished.
- o Sites should be graded for proper drainage and seeded.
- o Suspended ceilings should be installed in schools with exposed overhead wiring and plumbing. Noncode ceilings should be replaced.

- o Wooden stairwells should be replaced with a noncombustible material.
- o Air conditioning is needed for areas which are used year-round.

It would seem that maintenance will cost less when the new high school is built and the Macon, Littleton, and Afton-Elberon as well as the older facilities at North Warren and Hawkins are abandoned. Actually, the need for maintenance funds may increase as the new schools should have sophisticated heating and ventilating systems, air conditioning, and a larger site. The Committee recommends that every effort be made to obtain approximately 2% of replacement value for maintenance.

LOCAL STAFF POSITIONS

The average school system in North Carolina employs approximately 6.4% of the total instructional staff from local funds. In 1973-74, Warren County employed two high school teachers or approximately .9% of the instructional staff from local funds. While Warren will gain some efficiency in the utilization of staff when Littleton is closed, there is a critical need for additional librarians, art teachers, music teachers, and occupational exploration teachers at the middle school level. The Committee recommends that the Warren County Board of Education continue to seek funds for additional, local positions.

NEW CONSTRUCTION AND RENOVATIONS

In Phase I, the Committee recommended a new high school to serve approximately 900 students in grades 10-12. The special facilities such as cafeteria, gymnasium, and library should be planned to serve approximately 1,100 students in grades 9-12. Based on 1974-75 construction cost estimates (exclusive of land, site development, equipment, and fees), this new school should cost approximately

\$3,200 per student or \$2,880,000. The cost of land, site development, equipment, and fees is difficult to estimate; however, the total cost of this project based on 1974-75 construction data should not exceed \$3,600,000.

The Warren County Board of Education has several potential sources of funds which can be used for capital outlay of construction. They are as follows:

- o The Warren County Board of Education will receive \$1,069,420.89 from the 1973 Statewide School Construction Bond Fund. The Board also has \$19,440.22 remaining from the 1963 fund.
- o Warren County receives approximately \$160,000 annually from the local option one percent sales tax. Local option sales tax monies can be used for debt service payment or for school construction on a pay-as-you-go basis.
- o Warren County received \$336,055 in 1973-74 and \$321,793 in 1974-75 from revenue sharing funds. The future of these funds is uncertain; however, revenue sharing funds could be designated by the county commissioners for school construction.
- o Warren County presently has a bonding capacity of approximately \$7,000,000 for school and/or other county construction needs. If the citizens of Warren should approve a bond referendum for \$2,600,000 which would be added to the state funds to construct a new high school, the debt service payment would be approximately \$260,000 per year. If the debt service payment were to be paid from property taxes, a tax increase of approximately \$.276 would be required. If the one percent sales tax revenues were used for debt service, a tax increase of approximately \$.106 would be required.

The new high school will probably not be occupied in less than three years; consequently, approximately \$1,000,000 in revenue sharing funds could be accumulated in this period of time. If the commissioners designated the revenue sharing funds for school construction, the debt service payment on a \$1,600,000 bond could be financed from the sales tax monies.

According to the findings of the Survey Committee, Warren County will need new high school facilities if the population continues to decline or if unprecedented growth should occur. The new

senior high school which has been recommended in Phase I will not only benefit students in grades 10-12 but will also improve educational opportunities for students in grades 7-9.

In North Carolina, boards of education have the responsibility for developing long-range facility and program plans. The boards of county commissioners have the responsibility for providing funds to meet these needs within the county's capability. The Committee recommends that the Warren County Board of Education adopt a long-range facility and program plan. This plan, to improve the educational facilities and programs for all students in Warren County, should be submitted to the Warren County Board of Commissioners with a request for funding.

COMMUNITY

THE COMMUNITY

William Byrd, an earlier surveyor of the Carolinas and Virginia, described Warren County as the "Land of Eden." The areas along the fertile Roanoke River Valley were first settled by Virginians, many of whom were younger sons of proud aristocratic families. They acquired substantial acreage and established plantations. According to Bill Sharpe, noted North Carolina historian, "the early settlers of Warren quickly replaced cabins with manor houses; they acquired slaves; cherished education; and bred statesmen by the dozen."

Farming was immediately rewarding to the early settlers of Warren. The soil was rich; the area between the Roanoke on the north and the Tar on the south was traversed with creeks and streams with interesting names such as Fishing, Shocco, Sixpound, Hubquarter, Possumquarter, and Stonehouse. Almost every farm in Warren County had access to this network of water.

While agriculture, lumbering, and textile manufacturing were the major industries, Warren was also a fashionable resort area. Wealthy coastlanders fled the "miasma" of the lowlands. The White Sulphur Springs Hotel in the southwest corner of Warren, the Shocco Springs Hotel located a few miles northeast, and the Panacea Springs Hotel near Littleton became fashionable havens for the aristocracy between 1810 and 1930.

Warren County can be justifiably proud of the leadership which she has contributed to North Carolina and the nation. According to Sharpe, Warren County has contributed four governors, six attorneys general, three supreme court justices, and five magnates of the tobacco industry. From 1789 to 1841, Warren County had (with the exception of one term) unbroken representation in the United States House of Representatives.

The transition from an agrarian economy has been difficult for Warren County. Following the Civil War, plantation owners had increasing difficulty in securing a labor force to farm cotton and tobacco. The total population peaked at 23,539 in 1950 but declined to 15,810 in 1970. It appears that the decline was most significant among the farm population. According to the 1970 census, only nine per cent of the workers in Warren were farmers, farm managers, farm laborers, and

farm foremen. During the last decade, however, there has been a significant increase in the number of persons employed in professional occupations, clerical occupations, and assembly-line jobs.

Many of the residents of Warren are employed in industries outside the county. In 1960, there were 626 persons commuting outside the county for employment; by 1970, this number had increased to 1,431. For example, 289 persons were employed in Halifax County; 589 persons were employed in Vance County; 165 persons were employed in Virginia.

While Warren ranks below the North Carolina average in terms of per capita income, per capita retail sales, and per pupil property valuation, there are indications that her economy is stabilizing. In 1958, Warren County's per capita income was \$798.00 or 56.2 per cent of the North Carolina average; for 1970, Warren's per capita income had increased to \$1,963 or 61.2 per cent of the North Carolina average.

In 1969, Floyd B. McKissick announced a new planned community for Warren County. Soul City presently encompasses 2,200 acres, and the developer expects the community to eventually include 5,200 acres. The long-range plans for this community include 500 housing units and approximately 4,000 residents by 1980. If successful, Soul City could reverse the population decline and bring new industry and services to an economy which has been dependent on agriculture.

TABLE 1
WARREN POPULATION BY AGE

SCHOOL SYSTEMS SCHOOL SYSTEMS SCHOOL SYSTEMS

THE SCHOOL SYSTEM

The early settlers of Warren County had a strong commitment to education. In 1786, citizens in the Warrenton area raised funds by lottery to build the Warrenton Male Academy; this school served the young men in the Warrenton area until 1918. In 1802, the Falkener Female Academy was established; Jacob J. Mordecai established a school for girls in 1809; Little Ridgeway and Littleton also had schools for girls around 1810. In the early 1900's, private schools in Littleton included the Littleton Female College, Professor Bagley's School for Boys, and Central Academy. By 1916, Warren had 75 public schools in addition to the private schools.

Like the total population, the school population in Warren County has declined. In 1959-60, Warren County had 6,340 students in grades 1-12. By 1973-74, the 1-12 school population had declined to 4,039; population projections by the Division of School Planning indicate a further decline during the next five years.

The Warren County Administrative Unit is presently operating nine schools. In 1974-75, the John Graham School served grades 10-12, the Norlina School served grades 9-12, and the Littleton High School served grades 7-12. Hawkins serves students in grades 7-9 from the Graham High School attendance areas; the North Warren School serves students in grades 4-8 from the Norlina attendance areas. The South Warren, Boyd, and Vaughan Schools serve grades K-6. Northside Elementary serves grades K-3.

Warren County has a program of individualized, personalized instruction in grades K-6. The classrooms have interest centers where students work individually on mathematics, language arts, social studies, and reading. Although Warren does not employ special art or music teachers in grades K-6, there is evidence of good art and music instruction. Creative writing is also emphasized at all grade levels.

Approximately 69 per cent of the students in grades 10-12 are enrolled in occupational programs. The trade and industrial education programs which include drafting, bricklaying, carpentry, automotive mechanics, and industrial cooperative training serve approximately 256 students.

Warren County presently has 151 elementary students and 96 secondary students attending Warren Academy. Approximately nine students are attending the Vance County High School.

Many students from other administrative units attend the Warren County Schools. Approximately 109 students from Halifax County attend the Vaughan and Littleton schools. Approximately 173 students from Virginia attend the Warren County Schools.

Warren County serves exceptional children in the areas of educable mentally retarded, speech impaired, hearing impaired, visually impaired, crippled, learning disabled, and trainable mentally retarded. The EMR students, where possible, are mainstreamed (taught by regular classroom teachers with the assistance of specialists). The TMR students are served in a self-contained classroom at North Warren. Transportation for TMR students is provided by school buses, taxis, and private automobiles.

PUPIL POPULATION PROJECTIONS

Pupil population projections are useful within certain limitations. The projections are based on an analysis of the pupil population during the past years and are made on the assumption that no significant change will occur in the birth rate, holding power of the schools, or migration patterns. The projections are highly reliable for the first year but are less reliable with successive years, consequently, the projections should be updated each year or evaluated in terms of actual pupil counts.

The following are factors which cannot be anticipated but which can have an immediate impact on the membership in the school system:

- o An increase in employment opportunities resulting from a new or expanded industry.
- o A loss of employment opportunities resulting from the closing of a major industry.
- o An increase or decrease in private school membership.
- o Administrative unit boundary changes.
- o Large residential developments which do not result from a population increase but rather a population shift between administrative units.

The Division of School Planning relies on the pupil population projections, not as an absolute, but as the best information which is available. The school system is encouraged to update this projection each year as a tool for continuous planning.

SCHOOL FINANCE

SCHOOL FINANCE

While money alone will not guarantee a good school system, it is well known that a modern program of education is not possible without financial resources. The one best single determinant of a quality program of education is the financial factor. If spent properly, more money provides a better education; therefore, it should be a continuing interest and concern for all of the people of Warren County that the public education system obtain and use adequate funds to perform its tasks. The old adage, "education does not cost -- it pays", is still true and appropriate.

The State of North Carolina provides current expense funds, with some exceptions, to insure a minimum program of public education for all students. State current expense funds are not adequate for plant operation; state current expense is not provided for plant maintenance. These and other current expense needs require that local funds be made available to provide a minimal educational program. In addition to state and local resources, the federal government provides some current expense funds. The federal government makes current expense funds available through the Elementary and Secondary Education Act, the federally impacted programs, and other special acts or programs.

In addition to the state and federal monies required for a minimal program, substantial local support is necessary in order to provide a quality educational program. An important measure of the citizens' interest in education is their willingness to adequately support their public schools.

This section of the report will show the financial resources available to the Warren County Administrative Unit and how these resources have been used in recent years. Comparative data is available for the citizens of the Warren County Administrative Unit to evaluate their efforts and accomplishments in light of other school systems.

SCHOOL FACILITIES

Each school in the Warren County Administrative Unit was visited for the purpose of determining educational adequacy and to evaluate the facilities in terms of national and state standards. Standards by which the adequacy of the sites and classrooms were determined are as follows:

School Sites - Sites were evaluated by standards set by the Council of Educational Facility Planners. The Council suggests the following as minimums to which all should strive but most should exceed:

- . Elementary Schools - Ten acres plus an additional acre for each 100 pupils of projected maximum enrollment.
- . Junior High or Middle Schools - Twenty acres plus an additional acre for each 100 pupils of projected maximum enrollment.
- . Senior High Schools - Thirty acres plus an additional acre for each 100 pupils of projected maximum enrollment.

Classrooms - For several years, the accepted minimum size for regular classrooms has been 750 square feet. Recent educational program changes require several different sizes of learning spaces. For purposes of the educational evaluations presented in this report, the criterion of 750 square feet for general classrooms has been used; for special teaching spaces, evaluation was based upon program and activities for which the space is currently being used.

This section of the report includes general information for each school, construction data for each building and major addition based on the year of construction, and an engineering and architectural report. Each school was visited by William H. Price, consulting engineer, and Gerald H. Knott, consulting architect, for the purpose of evaluating the present conditions of all school buildings. A copy of their findings for each school is included in this section.

AFTON-ELBERON (organized as part of South Warren)

SDPI School Code Number - --
DSP Property Number - 930-3429

Water Supply System - On-Site
Sewage Disposal System - On-Site

General Information:

- . Size of Site - 4.85 acres
- . Grades Housed - K-1
- . Professional Personnel (Fall, 1974) -
- . Membership (Fall, 1974) -

Sanitation Inspections	Date	Rating

<u>Year Con- structed</u>	<u>Type and Use of Building</u>	<u>No. of Teaching Stations</u>	<u>Engineering-Architectural Evaluation</u>
1950	Classrooms, Cafetorium	6	One-story . Semifire-resistive . Stage in multipurpose . Fair finishes in cafeteria . Incandescent lights . Oil-fired boiler . Asphalt floor tile.

SITE - Rural site . Close to road . Large play area in rear.

ENGINEERING-ARCHITECTURAL RECOMMENDATIONS - Needed modernization should await a determination as to long-range use of this building.

MACON (organized as part of Boyd)

SDPI School Code Number -
DSP Property Number - 930-3422

Water Supply System - On-Site
Sewage Disposal System - On-Site

General Information:

- . Size of Site - 4.48 acres
- . Grades Housed - K
- . Professional Personnel (Fall, 1974) -
- . Membership (Fall, 1974) -

Sanitation Inspections	Date	Rating
School	10/21/74	95.5
Cafeteria	10/21/74	97.0

Fire Hazards Inspections
Electrical - -
Fire

<u>Year Constructed</u>	<u>Type and Use of Building</u>	<u>No. of Teaching Stations</u>	<u>Engineering-Architectural Evaluation</u>
1917 *	Classroom, Auditorium, Lunchroom		Two-story . Unused . Old style lights . Stairs connect floor (non-code) . No restrooms . Oil-fired boiler . Substandard lunchroom . Many substandard features.
1925	Classroom, Library	<u>4</u>	One-story . Wood-frame, brick-veneer . Metal roof . Heated from other building . Many substandard features.
	Total	4	

SITE - Small, rural site.

ENGINEERING-ARCHITECTURAL RECOMMENDATIONS - Phase out main building . Short-range use of single-story building is feasible if needed.

* The 1917 building is abandoned.

MIRIAM BOYD

SDPI School Code Number - 930-330
DSP Property Number - 930-3423

Water Supply System - Municipal
Sewage Disposal System - Municipal

General Information:

- . Size of Site - 6.16 acres
- . Grades Housed - K-6
- . Professional Personnel (Fall, 1974) - 30*
- . Membership (Fall, 1974) - 589

Sanitation Inspections	Date	Rating
School	10/15/74	95.5

1951	Classroom	5	One-story . Fire-resistive . Clerestory . Single loaded outside covered walks . Incandescent lights . New heating/cooling system . Oil-fired boiler.
1969	Office, Class- room, Multipur- pose, Library	<u>12</u>	One-story . Fire-resistive . Electric heat . A/C . Good finishes . Stage in multipurpose . Fluorescent lights.
	Total	17	

SITE - Quiet residential site.

ENGINEERING-ARCHITECTURAL RECOMMENDATIONS - Continue to use.

* Three kindergarten classes are located at Macon.

JOHN GRAHAM

SDPI School Code Number - 930-320
 DSP Property Number - 930-3420

Water Supply System - Municipal
 Sewage Disposal System - Municipal

General Information:

- . Size of Site - 9.4 acres (est.)
- . Grades Housed - 10-12
- . Professional Personnel (Fall, 1974) - 30
- . Membership (Fall, 1974) - 505
- . Mobile Units - 10

Sanitation Inspections	Date	Rating
School	10/30/72	90.5
Cafeteria	10/17/74	95.0

Fire Hazards Inspections	Date
Electrical	5/9/74
Fire	6/72

<u>Year Con- structed</u>	<u>Type and Use of Building</u>	<u>No. of Teaching Stations</u>	<u>Engineering-Architectural Evaluation</u>
1915	Classroom-Auditorium- cafeteria-library	17	Three-story . Ordinary-construction . Fluorescent lights . Oil-fired boiler . Sloped-floor auditorium with balcony . Finishing adequate on upper floors, fair on lower floors . Worn wood steps . Fair restrooms.
1937	Home Economics	1	One-story . Wood-frame, brick-veneer . Fluorescent lights . Oil-fired boiler also heats Agriculture Shop.
1937-45	Agriculture Shop	1	Partial two-story . Wood-frame, brick- veneer . Storage in basement . Some floor sagging . Temperature control problem reported.
1960	Gym	2	One-story . Fire-resistive . Wood gym floor . Folding bleachers . Some roof problems . Coal-fired boiler.

JOHN GRAHAM (Continued)

<u>Year Constructed</u>	<u>Type and Use of Building</u>	<u>No. of Teaching Stations</u>	<u>Engineering-Architectural Evaluation</u>
1969	Media Center		One-story . Fire-resistive . Electric heat . Fluorescent lights . Carpeted . Air-conditioned . Modern building .
1969	Carpentry Shop	2	One-story . Fire-resistive . Electric heat . Modern building.
1972	Auto Shop	<u>1</u>	One-story . Fire-resistive . Electric heat . Modern building.
	Total	24	

SITE - In town, residential site . Crowded . Many buildings.

ENGINEERING-ARCHITECTURAL RECOMMENDATIONS - Phase out temporary and older facility when possible. Improve on-site pedestrian circulation . Agriculture shop is considered first priority for removal.

HAWKINS

SDPI School Code Number - 930-312
 DSP Property Number - 930-3419

Water Supply System - Municipal
 Sewage Disposal System - Municipal

General Information:

- . Size of site - 13.9 acres
- . Grades Housed - 7-9
- . Professional Personnel (Fall, 1974) - 30
- . Membership (Fall, 1974) - 563
- . Mobile Units - 7
